

What's in your first box

- 1 peptide vial
- 4 alcohol swabs
- 1 sterile insulin syringe
- Order-specific card or QR
- Batch/lot and support pathway

Before you start

- Check the product name
- Check the batch/lot number
- Check the expiry date
- Check sterile packs are sealed
- Scan QR for approved instructions

If anything looks wrong

Do not use the product if:

- Vial is cracked or leaking
- Label does not match your order
- Sterile pack is open or damaged
- Cold-chain box arrived warm
- Approved instructions are missing

Contact the approved support pathway shown on your order or QR page.

Follow only the instructions supplied through the licensed wholesaler's approved process.
